## PROFESSIONAL SUMMARY

PHP Developer with 4+ years of experience in developing, maintaining, and optimizing web applications and enterprise management systems. Hands-on experience in PHP, Laravel, Slim Framework, MySQL, REST API development, and third-party device integrations, including RFID, UHF, and UVSS. Experienced in database synchronization, vehicle verification, image processing, PDF report generation, and production troubleshooting. Skilled in developing responsive interfaces, optimizing database queries, and integrating hardware with web-based applications, with a focus on performance, security, and reliability.

## PROFESSIONAL EXPERIENCE

**Developer** *Sigma eSolution Pvt. Ltd. ,* Ranchi, Jharkhand July 2022 – Present

- Developed and maintained web-based Visitor Management System (VMS) applications.
- Integrated RFID and UHF devices for vehicle identification, access control, and entry management.
- Integrated Under Vehicle Surveillance System (UVSS) devices with VMS applications.
- Designed and maintained RESTful APIs for vehicle data validation, system integration, and local-to-cloud synchronization.
- Developed dashboards, reporting modules, and dynamic data tables for operational monitoring.
- Optimized MySQL queries and resolved database and application-level issues.
- Configured and maintained application environments using Apache, XAMPP, and Linux.
- Developed responsive user interfaces using Bootstrap, JavaScript, jQuery, and AJAX.
- Performed application testing, debugging, deployment support, and production issue resolution.

## KEY ACHIEVEMENTS

- Successfully integrated UVSS and RFID/UHF systems with web-based applications for vehicle identification and monitoring.
- Implemented API-based vehicle data validation and synchronization between device systems and server databases.
- Developed and deployed a software update, resulting in a 30% reduction in system errors and improving application performance by 25%
- Improved application reliability by troubleshooting API integration, database, and production issues.
- Enhanced data monitoring and accessibility through optimized SQL queries, dynamic dashboards, and reporting modules.

## SKILLS

- **Programming Languages:** PHP, JavaScript, SQL, HTML5, CSS3
- **Frameworks & Libraries**: Laravel, Slim Framework, jQuery, Bootstrap, TCPDF
- **Database Management**: MySQL, MariaDB
- **API & Web Technologies**: RESTful APIs, JSON, AJAX, DataTables
- **Tools & Platforms**: Git, Apache, XAMPP, Linux, Windows Server
- **Integration & Development**: RFID/UHF Integration, UVSS Integration, API Development, Image Processing, Base64 Handling, PDF/Excel Report Generation, Database Optimization

## PROJECTS

**1. Visitor Management System (VMS)**

- Developed visitor registration, approval workflows, ID card generation, and reporting modules.
- Implemented image capture, storage, and visitor record management.
- Developed synchronization functionality between local and cloud databases.

**2. Under Vehicle Surveillance System (UVSS)**

- Developed REST APIs for vehicle data validation and synchronization between UVSS devices and server databases.
- Implemented vehicle verification, transaction status validation, and vehicle image handling.
- Developed SQL queries and reporting modules for vehicle transaction monitoring.

**3. RFID & UHF Vehicle Entry System**

- Integrated RFID/UHF devices and APIs for vehicle identification and entry management.
- Developed dashboards and database-driven features for vehicle monitoring and tracking.

**4. Vehicle Tracking System (VTS)**

- Developed vehicle tracking and fleet management modules with search, filtering, and reporting features.
- Implemented database-driven vehicle monitoring functionality to improve operational visibility.

**5. Hospital Management System (HMS)**

- Developed modules for patient registration, appointment scheduling, billing, pharmacy, and inventory management.
- Implemented search, filtering, and centralized record management functionality.

**6. Electronic Production Planning, Marketing and Sales (e-PPMS)**

- Developed modules for inquiry management, quotations, purchase orders, work orders, production planning, and dispatch tracking.
- Implemented centralized data management and reporting to support business workflows.

**7. Electronic Maintenance Management System (EMMS)**

- Developed modules for equipment inventory, maintenance requests, work orders, preventive maintenance, and reporting.
- Implemented role-based access control and audit trail functionality.

## EDUCATION

**Bachelor of Technology in Computer Science** 2022
*RTC Institute of Technology*, Ranchi, Jharkhand

**Intermediate of Science** 2017
*Gossner College, Ranchi, Jharkhand*

## LANGUAGES

**English** | **Hindi**
